

tactee

Autonomy Everyday Everywhere

The Tactee® system is a set of assistive devices designed to restore autonomy and independence in daily activities of people with mono or bilateral functional grasping deficits that aims to improve their **quality of life**.

The Tactee® system returns functional **autonomy** and **independence** in different daily activities such as eating, drinking, writing, etc.; eliminating the caregiver who's been considered indispensable so far.

HUMAN NEEDS, NOT SPECIAL ONES... Tactee® HELPS YOU IN A SIMPLE WAY

When the grasping element is approached by a Tactee®, tool, the magnetic force attracts it and allows to having a firm grip without using fingers. At the same time its special design allows an easy release, permitting interchanging tools without any effort nor assistance, in total **autonomy**.

The Tactee® method involves the use of the system along the **rehabilitation path** of the users and promotes it in every context of everyday life, in an easy, decent and independent way.

Tactee® is a **patented system** based on a innovative magnetic coupling solution, between a grasping element worn by the hand's user and various interchangeable tools that guarantee high performance in **autonomy** and **safety**.

The adapter is available in three sizes.
The measurement is taken around
the **MCP-joints**

- TT-01-S Magnetic adapter
Small, Universal Left/Right, 19–22 cm
- TT-01-M Magnetic adapter
Medium, Universal Left/Right, 21–24 cm
- TT-01-L Magnetic adapter
Large, Universal Left/Right, 23–27 cm

Tactee is available in a complete kit that
contains both the magnetic adapter, spoon,
knife, fork, multi adapter and a set of
extra padding

- TT-011-S Complete Tactee Kit · Small
