# magic XT4™

## VENTURE *Further*

The XT4 is the world's most extreme offroad powerchair in an urban-sized footprint. With front and rear suspension and servo powered steering, it's designed to extend the limits of personal freedom in a world that's not flat.

Delivering more range with high-capacity batteries and integrated high efficiency headlights as standard, the XT4 offers everything you need to venture further - with more confidence - than ever before.

### PRECISE FORWARD & REVERSE CONTROL

Even on slippery or low traction surfaces, the chair's intuitive steering delivers a feeling of reliability, responsiveness and control, both in forward and reverse. The XT4 steers using a unique combination of differential wheel speeds paired with an industry-leading servo steering module.

### INTEGRATED LED LIGHTING

Don't get caught out in the dark! Light your way with confidence thanks to our integrated front and rear LED lighting system.

## SUPERIOR PATENTED SUSPENSION

### Ultimate 4WD traction and stability

Our patented suspension coupled with the power of a motor to each of the four drive wheels delivers the ultimate in obstacle climbing, traction and control.

Front and rear wheels are mounted on their own pivoting arms that adjust independently to follow the contours of the terrain. This helps keep all four wheels on the ground and delivers a smoother ride, greater stability and more control across even the most extreme offroad terrains.

## IMPROVED BATTERY RANGE

### Go further for longer and see more

Large capacity\* batteries come standard on the XT4. These provide exceptional range for a powerful 4WD, extending your scope for adventurous exploration and boosting your confidence to go the distance.

Now you can go further for longer and with added peace of mind.

\*115Ah at C20 discharge rate.

## EATS KERBS FOR BREAKFAST

### 2800 Watts of unstoppable power

With four powerful 700-Watt motors, the XT4 delivers the power you need to plough through practically any terrain and tackle the toughest of life's obstacles. So, if your question is 'Can the XT4 take me there?', the most likely answer is YES!

Because the world's not flat™

# FULLY EQUIPPED FOR ADVENTURE

For people who love to push their boundaries. How much further will you venture?

## OFFROAD FEATURES & ACCESSORIES

The XT4 offers a range of powered features, seating and accessories designed to support and equip you for adventure. Stay comfortable all day while you enjoy your hobbies, explore new places or hit the beach. With accessories ranging from puncture-resistance kits and camera mounts to sunshades and fishing rod holders, we've thought of all you might need to discover more outdoors.

## REHAB OR MPS SEATING

Choose from our rehab or MPS seating and backrests, and a wide range of other options including fold-forward or removable backrests for ease of transport, swing away joystick mounts and a wide range of headrests. All core seating options are standard across the Magic Mobility portfolio.

## CHOOSE YOUR BASE COLOUR

Select from our three most popular colours. Our sleek, high-quality metallic finish adds wow factor, and gives depth and dimension to the XT range.
