Introducing the Movii Casero Bed Range

Comfort. Care. Casero.

The Movii Casero bed range represents a new era in comfort, dignity, and design for home and aged care environments. Thoughtfully rebranded from the trusted Casero range, Movii Casero continues to deliver the same reliability and functionality—now with a refreshed identity that reflects our commitment to innovation and wellbeing.

Designed to blend seamlessly into residential settings, Movii Casero beds offer advanced clinical features without compromising on style. With intuitive controls and advanced functionality, each bed supports both carers and residents in creating a safe, comfortable, and empowering care experience.

Whether for independent living or supported care, Movii Casero is more than a bed—it's a foundation for better living.

Movi Casero Eco Bed

Designed for ease of access in the home environment, the Casero Economy Bed brings reliable functionality and a strong support capacity to everyday care situations. Ideal for the home setting where space, access and simplicity matter, the modular frame delivers the essentials cost-effectively while maintaining the trusted Casero care standard.

Features:

- » Three-piece pull-apart frame ensures the bed can be easily transported and installed through tight doorways, stairwells or restricted access areas without compromising on performance.
- » Stylish head and footboard options to suit aesthetic and infection control preferences.
- » Quality LINAK motors, hand control and electrical components are low maintenance and offer smooth, quiet operation.
- » Electric hi/low functions allow effortless height adjustment for safer transfers and optimal caregiving access.
- » Automatic backrest regression focusses on patient comfort and skin integrity by automatically moving the backrest backward as it elevates, reducing shear and friction, preventing sliding, improving positioning and minimizing sacral pressure.
- » Electric back elevation provides comfortable upper body support, improving breathing, feeding, and overall user comfort.
- » Electric knee break function reduces pressure on the lower body and enhances positional comfort by raising the legs gently.
- » Mesh mattress platform improves breathability for the mattress, assisting microclimate management.
- » Integrated length extension adds up to 200mm to the bed frame, providing extra space and comfort for taller users without compromising stability or functionality.
- » Mattress retainers provide a stable surface for getting into, and out of bed.
- » Individual locking, twin wheel castors improve movability of the bed.
- » Strong build with a safe working load of 200kg, offering dependable support for a wide range of users.
- » Refer to pages 15-16 for range of options and accessories available.

Movi Casero Duo Bed

The Movi Casero Duo is a low-height care bed designed to reduce fall risk while supporting safe, independent living. It's expandable width function adapts to changing care needs, providing added space and comfort without needing to replace the bed.

Features:

- » Stylish head and footboard options to suit aesthetic and infection control preferences.
- » Quality LINAK motors, hand control and electrical components are low maintenance and offer smooth, quiet operation.
- » Electric hi/low functions allow effortless height adjustment for safer transfers and optimal caregiving access.
- » Electric back elevation provides comfortable upper body support, improving breathing, feeding, and overall user comfort.
- » Electric knee break function reduces pressure on the lower body and enhances positional comfort by raising the legs gently.
- » Solid mattress platform provides sufficient support for all mattress and sleeping surfaces.
- » Width adjustable bed frame provides greater comfort, safety, and pressure redistribution by adapting to changing user needs, while reducing the need for bed replacement as care requirements evolve.
- » Trendelenburg and reverse Trendelenburg functions improves circulation and supports care procedures, while seat and TV positions provide better postural support.
- » Integrated length extension adds up to 200mm to the bed frame, providing extra space and comfort for taller users without compromising stability or functionality.
- » Central locking, foot-end castors provide safer, simpler and more efficient bed mobility by allowing all wheels to be locked or unlocked with a single foot action.
- » Strong build with a safe working load of 250kg, offering dependable support for a wide range of users.
- » Refer to pages 15-16 for range of options and accessories available.

Movi Casero Companion Bed - Fixed

The Casero Companion Bed allows partners and caregivers to rest safely and comfortably alongside a Casero bed, supporting connection and peace of mind. Its adjustable height, minimal gap design, and folding frame ensure seamless alignment, easy home delivery and practical everyday use.

Features:

- » Ideal solution for couples, partners, or caregivers who wish to remain close and connected while resting.
- » Provides a safe, stable sleep surface positioned alongside any Casero bed, allowing you to rest comfortably within arm's reach
- » Its thoughtful design minimises the gap between beds, enhancing safety, comfort and interaction.
- » All existing features and functions of the primary Casero bed remain operational when paired as a Companion Bed set up.
- » The Companion Bed is available as a manual or electric adjustable frame and can be configured on either side of the primary bed for maximum flexibility.
- » The durable steel frame offers multiple height positions, ensuring alignment with the primary bed for a companion setup.
- » Bed frame folds in half to assist deliveries or for ease of storage when not in use.
- » Compatible with Casero Eco, Duo, Vogue and Mode beds, in Single and King Single sizes.
- » Refer page 15-16 for range of options and accessories available
